

PROMOTING DIVERSITY WITHIN YOUR ORGANIZATION

Diversity refers to an organization’s recognition and appreciation of the differences among its employees, as well as the variations within groups ([Olzmann, 2020](#)). This concept encompasses a wide range of socioeconomic, ethnic, racial, cultural, and demographic backgrounds, fostering a variety of experiences, lifestyles, and interests. This bulletin highlights the benefits and importance of promoting diversity within organizations and provides actionable strategies for fostering an inclusive workplace using the Plan-Do-Act-Check method.

Diversity includes various aspects of identity, such as sexual orientation, gender identity, marital status, age, language, ability and/or disability, perspectives, and values. Research indicates that diverse teams can significantly enhance productivity, as employees are better equipped to understand the needs of their peers and clients. This is beneficial to the organization and the clients that are served by ensuring equitable treatment in hiring, promotions, and compensation ([Minkin, 2023](#)).

Employers who actively seek diverse candidates may experience greater success with new hires

and access to a broader talent pool compared to other employers. Accessibility may also elevate leadership competencies through ethical standards, fairness, and mindfulness, enabling leaders to reflect the cultures of the communities they serve ([Mullin et al., 2021](#)).

To promote workplace diversity, consider implementing the Plan-Do-Act-Check approach:

Plan: Analyze the demographics of the current employee population to identify areas for improvement. This analysis will help in understanding the representation of different groups within the company.

Do: Establish a committee composed of a diverse team of employees committed to promoting positivity, diversity, and equality in the workplace. This committee will review existing policies and procedures, revising or creating new ones as necessary to foster an inclusive environment.

Act: Following the committee’s recommendations, develop a performance improvement plan to address gaps in current policies.

Check: Monitor the effectiveness of the implemented strategies and gather feedback from employees to make necessary adjustments.

It is important to ensure ongoing discussions in meetings about goals and outcomes. This continuous improvement cycle will help the organization maintain a focus on diversity and inclusion.

An organization can demonstrate support for all individuals, including those of different races, genders, creeds, and sexual orientations, by avoiding gendered language, personal biases, perceptions, and notions. Embracing diversity may be viewed as a strategic business model, where a variety of perspectives, perceptions, and opinions contribute to innovative and creative problem-solving.
